

VKB300

The VKB300/200 keyboard is the key system component that controls the speed dome network. There is a vari-speed vector joy stick to control individual domes and the global system. Users can control DVR's, decoders, as well as matrixes of cameras and monitors from the keyboard. The user can control up to 256 PTZ camera's viewing range independently. Convenience and performance - when it counts

VKB200
